

## MARYLAND AUTOMOTIVE MODELERS ASSOCIATION

Volume 6, No. 7 Mar. 1994

by: Timothy Sickle

About 56 (!) people were in attendance at last month's meeting, which was another low-key affair as is our tradition in our favorite location, the barn. Talk continued on final arrangements for our upcoming NNL. Raffle donations are rolling in daily, and we are in the process of choosing and ordering the new awards for those lucky few participants chosen by their peers for recognition. And I must say, they look cool! I would really love to have one of them sitting in my basement (Pigs would fly before I got one!). Anyway, get in gear and "strut your stuff" in hopes of getting one of these babies!

The raffle raised \$143.00 (plus \$27.40). The club would like to thank the raffle donors as shown below: George Openhym, Irv Arter, Dave Hebler, Ron Bradley, Ron & Bonnie Palmer, Ron Hamilton, Dave Johns, Jeff Decker, Lyle Willits, Dirk Johnson (a.k.a. Detail Master), and Replicas & Miniatures Co. of MD. Special thanks also go out to those as shown below:

It also bears mentioning at this time that Dirk Johnson (a.k.a. Detail Master, P.O. Box 1465, Sterling, Va. 22170) will be a very active supporter of not only our club, but many other clubs across the country as well. It's up to us to actively patronize Detail Master in appreciation of his continued support [Ed. Note: With the detail items he has currently available (or on the way!), I don't believe this will be a problem!]

\*\*\*\*\* For Your Information! \*\*\*\*\*

The meeting dates for 1994 have been "sent down from the Mountain" so to speak by our own Matt Guilfoyle (and not without some serious wrangling, I might add!). All meetings will be from Noon to 5 PM and as you will quickly notice, we will be in the barn four times this year! For the rundown, see below:

- |               |              |
|---------------|--------------|
| January 15 *  | July 16      |
| February 19 * | August 20 *  |
| March 19      | September 17 |
| April 16 *    | October 15   |
| May 14        | November 19  |
| June 18       | December 17  |

\* Yeah, you guessed it, we are relegated to the Barn for these meetings!

Look-Alike Keys make finding car a Challenge

Tanya Hannon climbed into the 1986 blue Chevy Nova, put her key in the ignition, started the car and drove to her home on Amherst, Mass.

Unfortunately, it wasn't her Nova. She had unlocked a look-alike parked less than 50 yards from where she had left her own car.

If the Nova had been equipped with a new European high-tech key system, it would have been safe from thieves-intentional or inadvertent. But North American ignition systems being the basic things they are, Hannon's key worked.

As with many low-tech contrivances, there is simplicity as well as an elegance to the way keys work. To start up a Ford, for example, you begin with a key that has ten little ridges cut into it. Five of the cuts are for the door locks and five are for the ignition.

When you slide the key into the ignition, it pushes up five spring-

loaded rods. Each bump on the key pushes up a rod to a specific height. If the key is the right one for that lock, the rods line up properly and the lock can rotate. Turning the key in the ignition completes a circuit that allows electric current to flow.

Almost instantaneously, this first circuit sets in motion the processes that complete a second circuit. This in turn starts a gear spinning that cranks the engine up to starting speed of about 200 revolutions per minute.

When you hear your car start, you release the key and a spring pushes it back into the running position. If you don't let go of the key, terrible things can happen because the starter motor-which first turned your engine over-can't possibly keep up with the engine when it is running at its normal speed.

While it's unlikely that someone could walk up to your car with their key and drive it away, it's not as improbable as you might think.

There are nearly 600 million registered cars in the world. Obviously, it's impractical for automakers to create a different set of locks and keys for each one.

In the United States, there is a federal requirement-adhered to by Canadian manufacturers-that each automaker must have more than 1,000 lock-and-key combinations. So if you try your Ford key in four different Ford vehicles every day, chances are good that within a year you'll find one that fits.

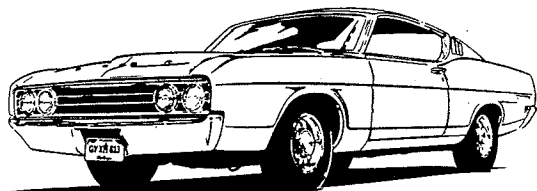

But that Ford key is not likely to work on European-made cars-even on Fords. These often work with a different type of key, which is shaped like a slim metal peg. The ridges on a European key project 360 degrees around the shaft, rather than just straight up and down, making for a much greater number of possibilities.

The most modern key system, used on car models in Europe that are favorites of thieves such as Ford's Escort Cosworth, have microprocessors embedded in the key and the lock (Ed. Note: Can you say Passkey?). The microprocessors communicate with each other electronically.

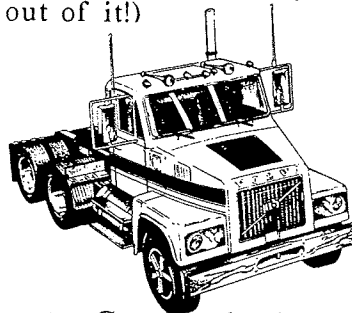

If 1986 Novas had such a system, Hannon might have been spared some trouble. As it was, the real owner of the car she was driving, Ian Quinn, reported it stolen. When police came to take his report, they noticed a similar car-Hannon's-parked nearby. The pieces of the puzzle were quickly put together, and the two car owners were put in touch with each other.

Hannon returned Quinn's car and shifted over into another car driven by a friend for the ride home. The pair pulled away from the curb and made a U-turn but unfortunately Hannon crossed paths with Quinn once again. She and her friend ran right into his blue Nova as he was pulling away.

(The preceding amusing little anecdote was written by Geoffrey Rowan and was pulled again from the Prince George's Journal dated February 11th. I hope you enjoyed it, 'cause I sure got a chuckle out of it!)

Volvo N10 with Refrigerator Trailer

[AMT #6628; 1/32nd scale Snapfast; 100+ parts; Gray, red, chrome (in plastic bag) clear (in plastic bag!), vinyl & plastic tires, decal sheet]

Aimed at the beginner, this kit features "Snap and Push Assembly". As such, there is only one version. I found very little flash and minor mold lines.

### Building the Tractor

The engine, consisting of a left and right half, is an inline six cylinder diesel with some decent molded detail. At this point, I started getting a bit disappointed at the complete lack of paint detail instructions.

The chassis, consisting of twelve parts, is made up of red, gray, and chrome parts. The tires for the tractor are two-piece plastic tires and the wheels are chrome five spoke. Chassis detail is well done for what has been provided.

The cab, consisting of twenty-four pieces, is a conventional cab with opening hood. The cab has the expected complement of lights, mirrors, horns, taillights, and stationary fifth wheel. Headlights are clear but taillights are molded into the mudflap. The interior is tub-style and consists of four pieces. The dash and instruments are well engraved. The windows are molded as a one-piece unit.

### Building the Trailer

The box consists of seven pieces, including opening doors. The chassis consists of twenty pieces including refrigerator fuel tank, air tanks, and mudflaps. Both raised and parked trailer jacks are provided.

The wheels and tires are twenty pieces. The instructions state that the wheels are plated but they are not. The trailer gets the vinyl tires. Nice Goodyears, too bad that the tractor didn't get them as well.

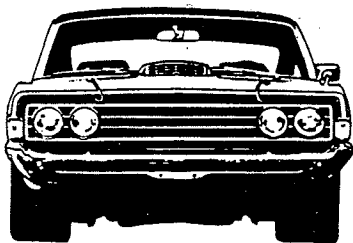

The decal sheet provides "Barron Freight Line" markings and hood glare decals. Trailer rear door markings are provided along with (2) Washington state license plates.

The chrome parts are nicely plated. The red tractor parts had no visible defects. However, it would be a shame to build this kit and not paint the tractor and trailer.

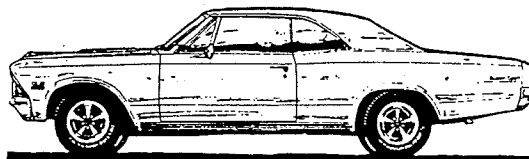

The instruction sheet is large and easy to read. All parts are named and identified by either a number or letter. Even for a beginner, I think some basic paint details should have been offered. The box art displays a nicely built model that has been painted and detailed.

I am looking forward to building this as a relaxation model. Maybe some flames (from the parts box) and some personalizing of the trailer (Ed. Note: Gary may have just created a new class- Pro Semi? Or would that be Semi-Pro?!?).

Sneakin' a Peek!

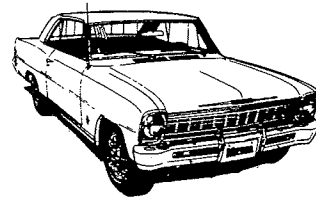

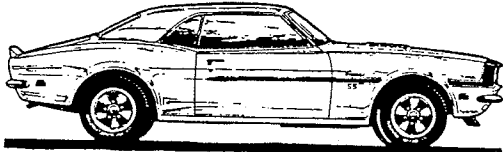

This column will appear as frequently (or infrequently!) as new releases from the manufacturers. The idea behind it is to give a "thumbnail review" of the releases as they hit the shelves with a detailed review to follow at a later date (hopefully!). We'll see how it goes!

\* Viper GTS Coupe (AMT #8055): Molded in Lt. Gray....Re-hash of Roadster....Seemingly correct body including double-hump roof, NACA-ducted hood....proper chrome 5-spoke wheels....sidepipes contain proper block-offs and rear "export" exit pipes as did concept car....and, wait....nobody leave the room! Windshield wipers are missing!

\* '94 Vette convertible (AMT #8073): Molded in Lt. Gray....Re-hash of '93 convert....same smoke-colored turn signals/parking lights....colorful South Dakota and "Corvette Fever" plates....same Goodyear GS-C tires.

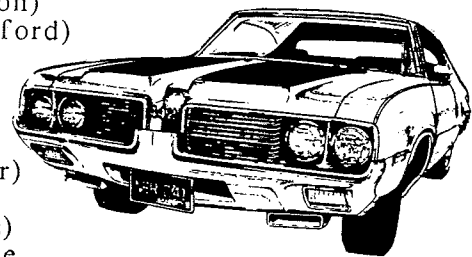

\* **Dodge Ram 2500 Snapfast Pick up** (AMT #6199): Molded in very nice, glossy black....incredible packaging- a bag in a bag in a padded bag!...Goodyear Wrangler AT's mounting Dodge chrome 5-spoke wheels (with Ram's Head center cap!)...separate dash face insert with good engraving....chrome grille/headlight unit, chrome rear step bumper...."MAGNUM" Nebraska plate, "RAM 2500", "DODGE" logo decals, and stripes. (Good job, AMT! Now give us a V10-powered dualliel)

\* **'69 Pontiac GTO Judge** (Monogram #2443): Molded in Carousal Orange....Re-hash of earlier Judge....proper new Hurst shifter....New Ram Air Air cleaner....new decals including "RAM AIR" for hood scoops, hood tach face, glove box "Judge" emblem, stripe schemes in (3) different colors, "JUDGE" Il plate (stripes don't seem to be proper colors)

### BITS & PIECES

- \* **NNL Sign-up.** Remember, we will be circulating a sign-up sheet between now and our show this year (in May), so you have plenty of time to sign up. And if you do sign up, please show up, OK? We are also actively seeking ideas for activities at the NNL such as **blind builds, scrambled car names, name the parts, and coloring contests** just to name a few. If you have any ideas, let an officer know at an upcoming meeting.
- \* **SSP.** The SSP subjects from Monogram/Revell for the next quarter are as follows: **Sheriff's Blazer, 1937 Cord, Model A Touring, Red Baron Show car, and the Ed Roth Beatnik Bandit.** If any of these get your creative juices flowin', contact your local hobby shop to latch onto 'em. Thanks to **John Mauchamer at Wheels** for the info.
- \* **Waytogo!** Seems as though MAMA member **Charlie Bennett** and the infamous **Indy Car** have gotten more press! According to Charlie, the latest issue of **Indy Car Racing** ran a very nice multi-page article on this miniature open wheel wonder. Charlie is quick to credit the excellent photography of **Dirk Johnson** and **Ray Gomez** for the excellent showing. According to Charlie, this **the first scale feature** in this magazine in its **ten year existence!** Also receiving some more notoriety are none other than **Irv Arter** for his black 'Vette, **Norm Veber** for his '62 Bel Air, and **Larry Boothe** for his T-Bird. These appeared in the Toledo coverage in the latest SAE.
- \* **Club News!** Seems as though one of our own, **David Mark Wheeler** has started a **model club** which meets in the **Glen Burnie** area. Known as **"Our Model is Christ"**, they meet at The First Christian Church, 320 Oak Manor Drive, Glen Burnie, MD 21061 between 1 and 4 P.M. and everyone is welcome. Meeting dates are listed below (with seminars scheduled as well):
  - Feb. 12th-Model Prep (Tim Sickle)
  - Mar. 12th-Interior Flocking (Dirk Johnson)
  - Apr. 9th-Applying Decals (Harold Bradford)
  - May 14th-Open
  - June 11th-Open
  - July 9th-Open
  - Aug. 13th-Open
  - Sep. 10th-Basic Spray Painting (Irv Arter)
  - Oct. 8th-Open
  - Nov. 12th-Engine Detailing (Tim Powers)
  - Dec. 10th-Christmas Party/Gift Exchange

If you are interested in attending, have questions, or are possibly interested in giving a seminar, contact **David Mark Wheeler** at (410)536-8175.

- \* **Fine Art.** The April 1994 issue of **Automobile** magazine has a very nice feature on none other than **Gerald Wingrove** and his masterpieces.
- \* **More Fine Art.** Our own **Ron Bradley** will begin carrying a line of prints from a local artist by the name of **Tim Frederick** (Ed. Note: With a name like that, he can't be all bad!). His subject matter includes **Nostalgia Drag Racing of the 60's & 70's, Customs, Musclecars, and Street Rods.** The prints are in color, measure 11x14, are limited and numbered, and sell for only **\$12.00 each!** Anyone present at last month's meeting can attest to their quality as the **Little Red Wagon** print on display demonstrated!
- \* **Ramblin'!** I would like to thank the guys from the **Top 'O Texas** club for the mention of our little group in their January '94 newsletter in connection with the info we printed on Testors new line of paints. I am flattered to think that someone other than our club members reads my miscellaneous ramblings!
- \* **Neon Brookfield.** No, he isn't a new sports superstar. Seems as though the **Brookfield Collector's Guild** has a collection of diecast Neons available. They have a Dodge version, a Plymouth version, and a very graphic racing version. Interested? This was also advertised in the latest **Automobile** magazine.
- \* **Remember "The Kat".** Don Graham is undertaking a collection to place a marker at Budd Andersen's final resting place. In exchange for a significant contribution, you can receive a copy of a video made by Don entitled, "A Tribute to Budd Andersen". Accordingly, MAMA's BoyZ sent a donation in the clubs name. The video will be made available to all interested parties when it arrives.
- \* **Another Scale Magazine!** The title of the magazine is **In Scale Illustrated** and is written by Tim Bongard (of Model Firehouse Fame) and is published by Walker P. Stevens & Company. It will be a full color magazine with how-to articles, regular columns, and it will cover all vehicles (including military & emergency). A one-year subscription (4 issues) is \$16.00. A sample of the premier issue is available for only \$4.75. Interested? They can be reached at P.O. Box 1468, Kingston, PA 18704 or by phone (toll-free) at (800)574-6229 from 8 A.M.-5 P.M. Monday-Friday.
